SUMMARY

"Achieved 94.4 percentile in the NSCT (National Skills Certification Test), ranking in the top 6% nationally across core CS domains." Dynamic and passionate Data Science enthusiast with a robust foundation in programming and problem-solving. Certified in Microsoft AI-900, with a strong grasp of artificial intelligence concepts and their practical applications. Proficient in object-oriented programming (OOP), data structures and algorithms (DSA), and a versatile coder with expertise in Python, Java, C++, and C. Skilled in SQL for efficient database management and web technologies like Node.js and React.js for building responsive, data-driven applications.

EDUCATION

DHA SUFFA UNIVERSITY

[JULY 2022-JULY 2026]

Bachelor of Science in Software Engineering

- Relevant Coursework Completed:** Artificial Intelligence, Machine Learning, Programming Fundamentals, OOP, DSA, Calculus and Analytic Geometry, Probability and Statistic & Linear Algebra, ML, Data Science, Cloud Computing

EXPERIENCE

- Escologics – AI Engineer:** Designed and implemented AI-driven chatbot solutions, including the UniAdmire chatbot, leveraging NLP and LLM technologies to deliver scalable, real-world conversational systems. [July 21, 2025 , to October 21, 2025]
- Apexcify Technologies – AI Engineer:** Developed interactive Python applications and games with advanced AI, pattern recognition, and algorithmic logic, demonstrating strong programming fundamentals and AI integration skills. [15th Nov 2025 to 15th Dec 2025]
- DevelopersHub Corporation – AI Engineer:** Gained hands-on experience in machine learning, data analysis, regression modeling, stock prediction, and AI chatbot development through real-world Python projects and EDA tasks. [1st Jan 2026 to 15th Feb 2026]

PROJECTS

- EV Station Application:** Developed an AI/ML-based EV station placement system using data analytics, geospatial visualization, Power BI, and React.js to support optimal infrastructure decision-making.
- General Health Chatbot:** Built a secure AI-powered health chatbot using Gemini API, Flask, and web technologies, ensuring safe, rule-based medical responses with real-time user interaction.
- Rock-Paper-Scissors Game:** Implemented an intelligent Python-based game featuring both random and learning AI models that analyze user patterns to improve decision-making accuracy.
- Hybrid Python FAQ Chatbot:** Designed a hybrid NLP chatbot leveraging TF-IDF, cosine similarity, and Gemini 2.5 Flash to deliver accurate, domain-specific, and controlled AI responses.
- Image Classifier (Teachable Machine – TFLite):** Developed a real-time image classification system using TensorFlow Lite and webcam integration, optimized for fast inference and reliable deployment.
- News Topic Classifier Using BERT:** Fine-tuned a BERT-based transformer model for news topic classification using Hugging Face, achieving strong accuracy and F1-score with live deployment via Streamlit/Gradio.
- End-to-End ML Pipeline for Customer Churn Prediction:** Built a production-ready machine learning pipeline using Scikit-learn Pipeline API, GridSearchCV, and joblib for scalable customer churn prediction.
- Multimodal Housing Price Prediction System:** Developed a multimodal regression model combining CNN-extracted image features with tabular data to predict housing prices, evaluated using MAE and RMSE.
- Context-Aware Chatbot Using LangChain (RAG):** Implemented a context-aware conversational AI chatbot using LangChain and Retrieval-Augmented Generation (RAG) with vector search and memory-enabled responses.
- Auto Tagging Support Tickets Using LLMs:** Designed an LLM-powered ticket classification system using prompt engineering, zero-shot, and few-shot learning to generate ranked multi-class support tags.

SKILLS

- Technical Skills:** AI Engineer and Data Science practitioner with strong expertise in Machine Learning, NLP, LLM-based systems, and data analytics. Highly proficient in Python with hands-on experience using Pandas, NumPy, scikit-learn, TensorFlow Lite, Hugging Face Transformers, and LangChain for building, evaluating, and deploying AI solutions. Skilled in data preprocessing, EDA, feature engineering, and visualization using Power BI, along with backend integration using SQL, REST APIs, Flask, Node.js, and React.js

CERTIFICATIONS

- NSCT – National Skills Certification Test | 94.4 Percentile (Top 6% Nationally) | DHA Suffa University | April 2026
- AI/ML Engineer Certification – UniAdmire, Apexcify Technologies & DevelopersHub Corporation
- Microsoft Azure AI-900 Certification – Azure AI & ML Fundamentals
- Foundations of Data Science Certification – Data Analysis & Decision Making
- Flutter Bootcamp '25 – GDGoC (Mobile App Development)
- Web Development Internship – CodSoft
